

Iona Court Multi Storey Blocks - Glasgow

We are employed, as Principal Contractor, by GHA Housing Association. The scope involves the full demolition and demands the specialist ultra-high reach machine demolition of these 3 - 20 storey blocks in a live residential environment in Govan Glasgow

This type of project demands and requires a very high level of co-ordination and project management for the varying preparatory demolition processes along with the integration of major machine structural demolition works in an extensive residential area in the city centre site in Glasgow. We planned the structural demolition through a very diverse combination of technical demolition solutions demanding a very high degree of planning, co-ordination, awareness, expertise, management and supervision.

Working with the residents and residential home occupants in the live residential area. Working around other occupied residential estate and adjacent commercial premises. This again will demand ongoing daily liaison between our supervision / management and the local Housing & Council representatives and employees particularly during the sensitive stages of the major sections of structural demolitions preparation.

Roads and traffic management within the area of Govan in Glasgow City. Close liaison with the GHA, SPT, Utilities and Emergency Authorities for all arrangements again are ongoing in the preparation stage.
